KI

Strive is a new seating collection designed by Italian furniture designer Giancarlo Piretti, providing simple and elegant chair designs at an affordable price. The collection consists of stacking chairs, café stools, nesting chairs, task chairs, task stools and fixed seating available in a choice of nineteen colours. All have a flexible back with a wire rod inserted into the polypropylene to encourage movement and relaxation. The back curve provides lateral support and the contoured seat dissipates pressure points. Strive has a ten year warranty, is Greenguard certified for Leed accreditation and is ideal for providing solutions for business, education and healthcare sectors.

ANTRON

The Chicago Athenaeum: Museum for Architecture and Design, has given the Modena design by Vorwerk Carpets the Good Design Award 2008 in the Floor and Wall Coverings category, underlining carpet's growing stature as an object of design. The reasons given by a panel of renowned designers, architects and art experts was that Modena was "A stand-alone, highly self-assured world of colours and space-encompassing irregular stripes". With a dedicated design team, Antron carpet fibre plays a key role in shaping many carpet designs, working closely with carpet manufacturers' own designer to create products that strive towards creating striking interior spaces.

ORIGINAL BTC

The Titan pendant lamp, pictured here in red is just one of many from the lighting collection offered by Original BTC. Hand-assembled in Oxford from the finest aluminium, chrome and bone china, Original BTC's table, floor, wall and pendant lights are ideally suited to residential and commercial properties alike. Quality, detail and mix of materials is key: metallic painted, glass or china shades are paired with polished, satin or chrome bases, offset by matching cotton braided flex. Functional and practical, stems can be raised and lowered and shades angled to create the perfect ambience.

MK ELECTRIC

Designed to provide a complete solution for all residential television, radio and audio needs, the new range of multi-media devices from MK Electric consists of combination plates and audio-visual outlets which complement the company's Logic Plus and other decorative collections. The combination plates provide a complete multi-media solution in one device. The four-gang large combination incorporates TV, FM/DAB, two Satellite, BT and four 13A switched socket outlets. Also fully compatible with Sky Plus, the plates feature space for four Euro modules for additional audio, data or power requirements. The new audio-visual modules ensure unsightly cables are hidden while providing excellent connectivity and are available in screw terminated RCA and gold plated binding posts.

LLOYDESIGN

Alumina is a table made of environmentally friendly, forested hardwoods and 19mm toughened glass, which creates a meditative ambience. The image is sandblasted onto the reverse of the glass and highlighted by the coloured LED lights in the base, which can be phased through a spectrum of colours or set to suit the environment. The image can be sandblasted with any design including a company logo. It is especially suited for bars, clubs or reception areas and can be made to bespoke requirements.

LEES OF THE MOHAWK GROUP

En Vogue from Lees of The Mohawk Group offers commercial interiors a floor inspired by fashion and designed to perform. En Vogue is a modular carpet available in two styles to bring polished patterns and bold hues to workspaces. Manufactured from high performance Invista Antron Legacy and available in ten a-la-mode colours, Glamorous Life and Silhouette are created with the 2E process that allows for the most advanced combination of large pattern repeats and multiple-pile heights. En Vogue also features the lifetime warranted Lees Duracolor stain-resistant dye technology integrated into the carpet fibre to provide permanent stain and fade resistance.

SENATOR

Zenith is a meeting and conference chair with comfort and flexibility – a four-legged stacking chair with several material configurations for the arms and backrest. Its common features are the satin chrome aluminium casting that links the backrest and armrest, and the rectangular tube frame and upholstered seat. The chair is slender in appearance but robust in nature, and is offered in a black plastic back and armrests, or an upholstered or veneered backrest and armrests in either beech, oak or rich warm walnut.

ARTMODUL

Artmodul's website offers an interactive furniture configurator with 9000 different components, to help users position furniture in their interiors. Colours, materials, handles and sizes can all be varied, making each creation unique. Pictured is Artmodul's Lowboard Lemon, which is manufactured exclusively in Switzerland. Fronts can be constructed with wenge, walnut, birch, aluminium and zebrawood, making Artmodul also suitable for use in the home.
